DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 13, 14, 16-23, 28-31 stand rejected under 35 U.S.C. 103(a) as being unpatentable over MOORE.

Applicant argues MOORE does not disclose making a granular pesticide comprising coating a core with an inner polymer formed in situ, then applying a pesticide on the inner polymer and forming in situ as outer membrane. Moore does provide granules of core materials, "a central mass" (column 2, lines 46-52) of (column 13, lines 50, 51) ammonium sulfate, coated with a coupling agent or base coating (column 3, lines 6-40) and then a sealing layer. Coatings are performed by reaction of agents, seen as the instant in situ-not further described. Pesticides can be additives, as components of the coating (column 5, bottom).

Claims 15, 24-27 stand rejected under 35 U.S.C. 103(a) as being unpatentable over CUMMINGS in view of MOORE.

Applicant argues CUMMINGS is contrary to ammonium sulfate. However, claim 15 depends on 13; there is no ammonium sulfate.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
